CONQUERING IS NOT JUST ABOUT TERRITORY, BUT ABOUT THE ERA.

By taking a completely new stance and defying the tides, mere existence is enough to demonstrate power.

Starting is the beginning of the journey.

TOYOTA'S MID-SIZE SUV BOASTS A GLOBALLY MAINSTREAM DESIGN.

Evolved through six generations, trusted by over 15 million owners worldwide. Features include: Hammerhead design language, C-shaped full LED intelligent headlights, hexagonal satin chrome front grille, and 20-inch machined wheels*.

A completely redesigned rear end features a continuous piano black combination taillight.

RAV4 HYBRID

RAV4's powerful 2.5-litre Hybrid powertrain delivers outstanding performance without compromise. It gives you confidence in every driving situation, from fast-moving motorways to congested cities with emission restrictions and challenging road conditions. And thanks to its self-charging Hybrid powertrain, you'll also enjoy exceptional range - giving you the benefits of electric power, such as a quiet drive and greater efficiency, without inconvenience.

With RAV4 Hybrid, you can glide through the city, embrace the open road and leave compromise behind.

Scan the **QR code** to learn more about the RAV4 Hybrid.

PERFORMANCE

Beneath the sculpted body of the HEV variant lies Toyota's legendary, self-charging fifth-generation Hybrid Synergy Drive system, delivering an exhilarating performance without ever needing to plug into a wall. The powertrain combines an ultra-efficient 2.5-litre, 4-cylinder petrol engine with high-output electric motors to produce a combined, muscular output of up to 236 horsepower.

TNGA - Toyota New Global Architecture

TNGA is now the foundation for all Toyota's future powertrain and vehicle development. It marks a revolution in the way Toyota designs, engineers and manufactures vehicles, streamlining the process by standardizing the size and position of key components within standard new vehicle platforms. In this way it is integral to Toyota's mission to build ever-better cars

TNGA enables customers to enjoy more stylish cars that are safer and more enjoyable to drive through:

- Improved driving dynamics with a low center of gravity.
- Styling freedom
- Improved safety performance
- Improved efficiency & core strength

TOYOTA'S NEXT-GENERATION VEHICLE MANUFACTURING TECHNOLOGY:

EXPLORE A NEW DRIVING EXPERIENCE

HIGH-RIGIDITY BODY

HIGH HANDLING PLEASURE

LOW CENTER OF GRAVITY DESIGN

EXCELLENT DRIVING VISIBILITY

HIGH- PERFORMANCE SUSPENSION

DISCOVER HYBRID

Toyota has pioneered Hybrid technology for more than 25 years. Our Hybrid cars are enjoyed by millions of drivers on the road today. Toyota's latest fifth-generation Hybrids combine an electric motor and a petrol engine in one best-of-both-worlds powertrain, delivering impressive performance and driving range.

Why Hybrid?

Refuel as usual

Refuelling a Hybrid car is easy. Top up your Toyota Hybrid with petrol at a filling station, as you would a conventional car.

Responsive and efficient

Toyota Hybrids seamlessly combine petrol and electric power to optimise efficiency and deliver smooth, responsive power. They drive much like a conventional car but can cover up to 42% of your driving distance and 56% of your driving time in electric-only EV modes.

No Plugging In

Toyota Hybrids charge their batteries while braking and coasting. Together with their onboard combustion engine, this means you don't need to worry about electric range, and no need to plug in your car to charge.

SCAN THE QR CODE RAV4 HEV

TOYOTA SAFETY SENSE

Toyota Safety Sense features a set of five active technologies with the ultimate goal being to reduce traffic accidents as much as possible, helping to create a safer driving environment for everyone, while supporting you in your daily journey.

Pre-Collision System
Recognizes a potential head-on impact and a wide range of objects in the car's path, including pedestrians, cyclists and motorcycles.

Lane Departure Alert
The lane-centring function will alert the driver if the vehicle starts to deviate from it's lane.

Automatic High Beam
Designed to optimise visibility during night driving by automatically switching between high and low beam for oncoming vehicles and leading traffic

Road Sign Assist
Monitors the road signs ahead, displaying useful information such as the current speed limit.

Adaptive Cruise Control
Drivers can choose their cruising speed at a pre-set distance from the vehicle in front. If this distance falls, the system will reduce it's speed.
